**Foreclosure
Grove - Pricing**
www.foreclosuregrove.com

(Partial screenshot)

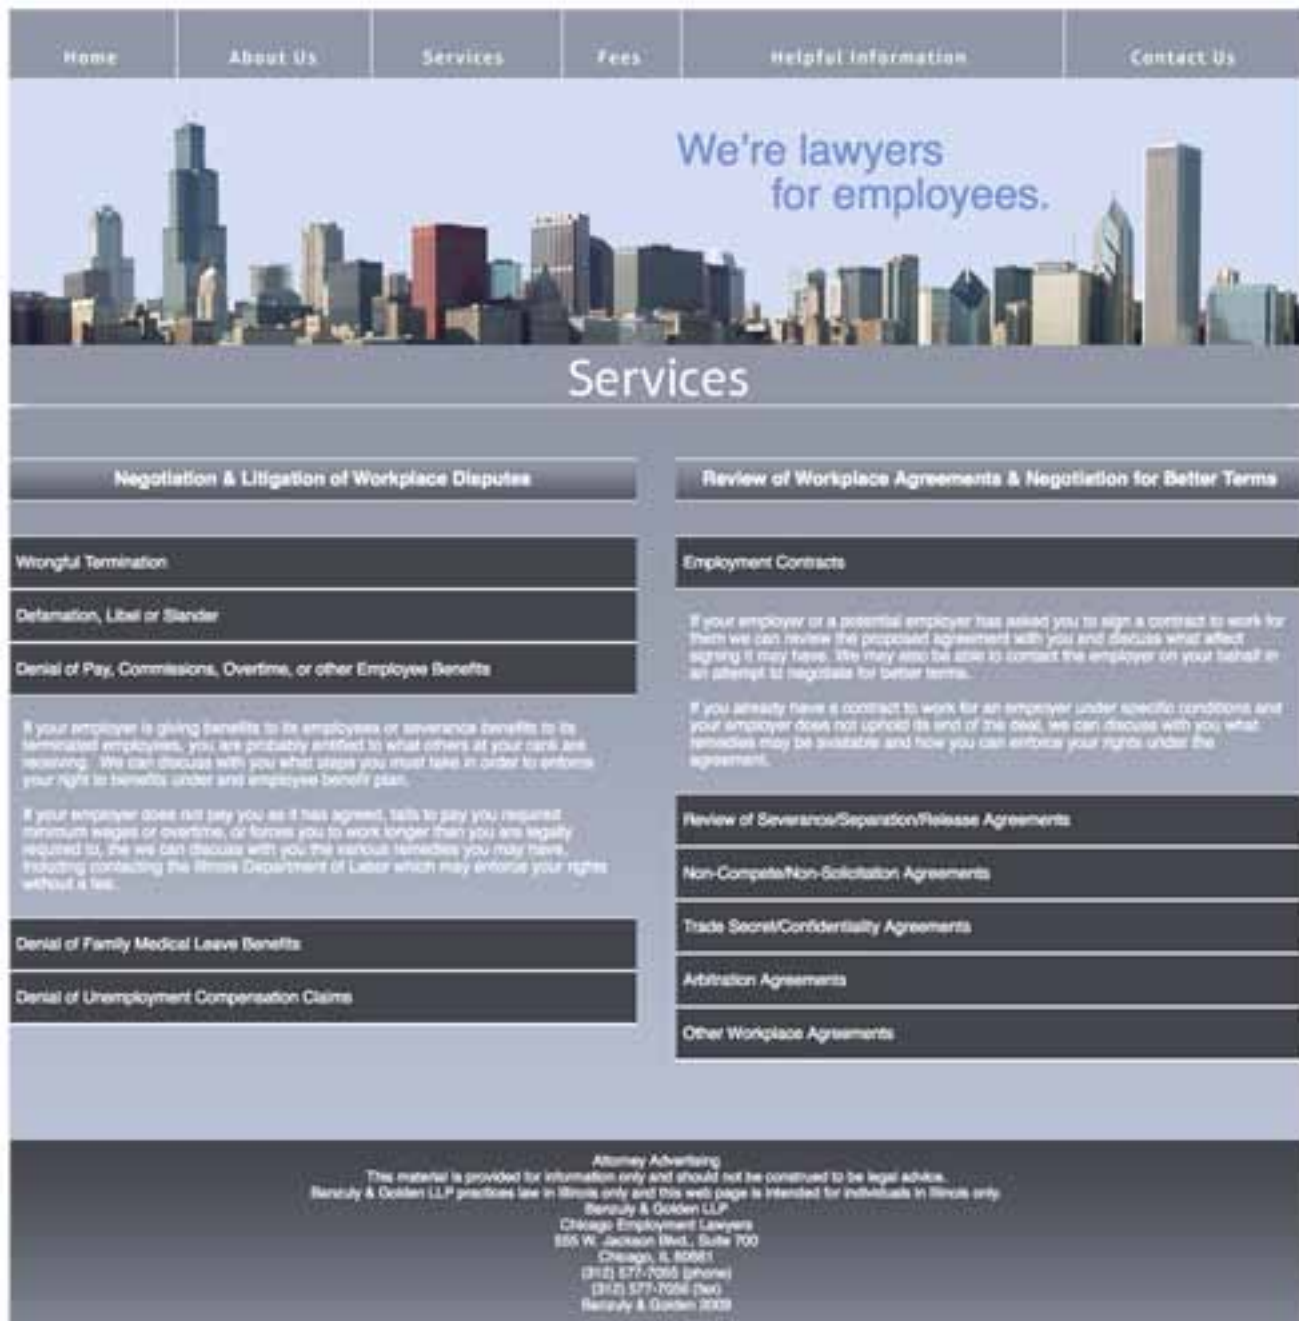

The Foreclosure Grove pricing page provides an example of how smart design can draw the eye to featured page elements. In this case, the monthly pass is prominently displayed through thoughtful design.

**Banzuly & Golden,
LLP - Home**
www.lawyersforemployees.com

(Partial screenshot)

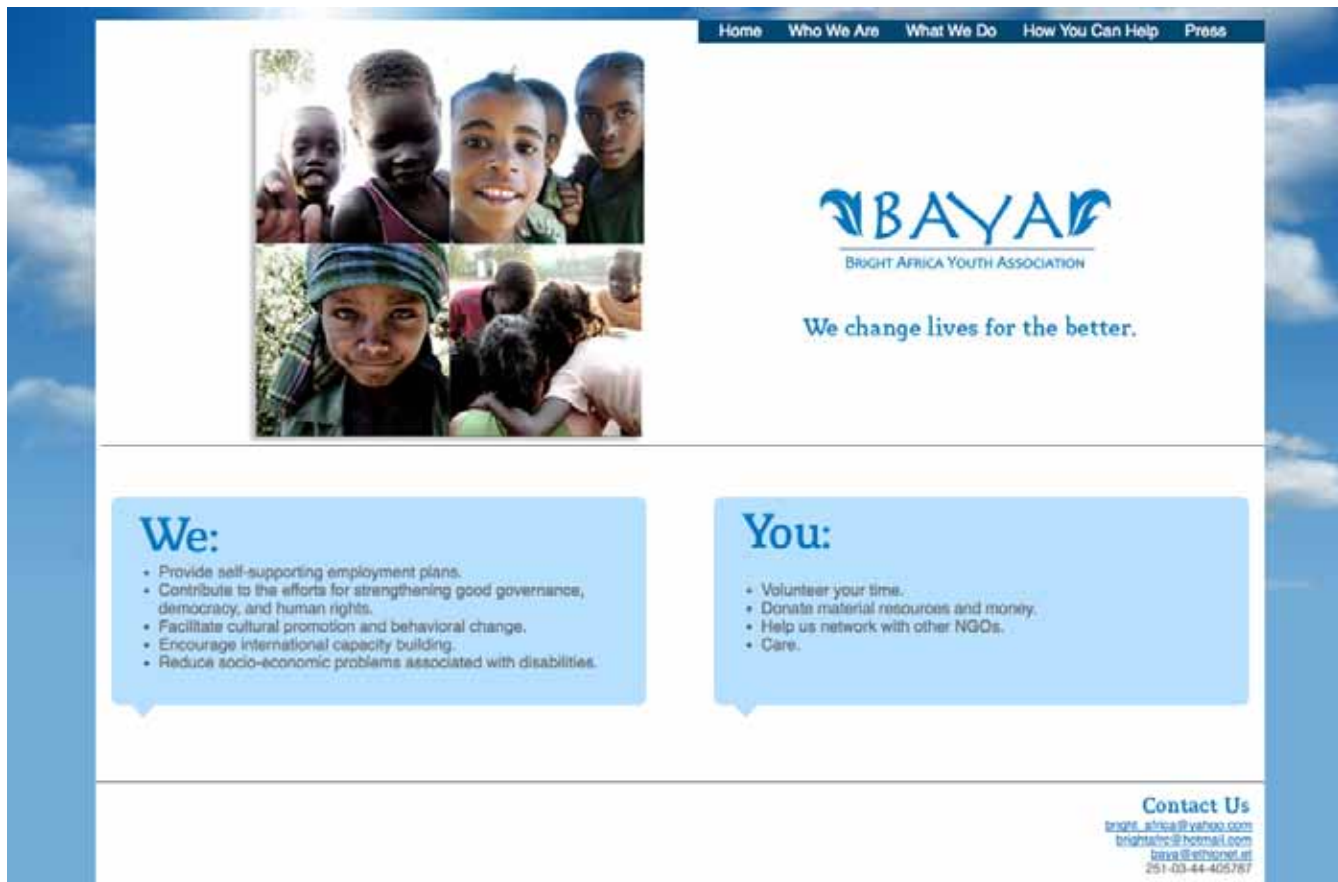

Banzuly & Golden LLP is an employment law firm located in Chicago. This page demonstrates how custom images can give a site local color and character.

**Banzuly & Golden,
LLP - Services**
www.lawyersforemployees.com

(Full screenshot)

The Banzuly & Golden services page shows current web technologies can be used to condense information and improve usability. In this case, jQuery accordions are used to collapse a large number of services into a single manageable screenful.

BAYA - Home
www.brightafricayouth.com

(Full screenshot)

This is the homepage for Bright Africa Youth, an NGO based in Ethiopia. We developed this site pro bono as part of our ongoing commitment to bring web technologies to small non-profit agencies.

My Florida County Redesign - Home

This is the homepage for the redesign of MyFloridaCounty.com, a large e-commerce site which provides municipal services to Florida residents. Although still in development, this site will be full-featured, enterprise level e-commerce site.

Print

Although our work has increasingly shifted toward new media and application design, we still enjoy working in print. These examples are part of a series of projects related to anti-tobacco advocacy. We worked closely with local advocates to research, design, and develop effective campaigns to prevent tobacco use.

**Breathe New
Hampshire Fund-
raising Materials
- Cover**

Breathe New Hampshire is a statewide lung health program and anti-tobacco campaign. This cover design demonstrates how typography and images can work together to establish effective branding.

Discipline starts at the top

As coaches, you help boys become men, to become husbands and fathers and grandfathers - if they live long enough, that is.

In Suwannee County, our boys are three times more likely to use spit tobacco than teens living just one county over. Many of these teens will end up with serious medical conditions, like cancer, as a result of using spit tobacco. Some will even die, because of a habit they started under our watch.

We can change these attitudes. As coaches, we're more than just teachers, we're role models.

But when it comes to spit tobacco, we're not fulfilling our duty. As a result, spit tobacco use remains a huge problem among our young men.

These same young men will soon be the leaders of our community - fathers, farmers, businessmen. They need our direction.

For a better Suwannee County

Your body is a temple

...though in Suwannee we don't always act like it

"What? know ye not that your body is the temple of the Holy Ghost which is in you, which ye have of God, and ye are not your own? For ye are bought with a price: therefore glorify God in your body, and in your spirit, which are God's." (1 Corinthians 6:19-20).

In Suwannee County, our boys are three times more likely to use spit tobacco than teens living just one county over. Many of these teens will end up with serious medical conditions, including cancer, as a result of using spit tobacco. Some will even die, because of a habit they started when they were young.

We need our pastors to take a stand on this issue. We need you tell your congregation that this is a serious problem, a problem that effects our families, our friends, and our community. We need our pastors to tell their congregation that this is not a harmless habit and that, as a church leader, you are determined to stop spit tobacco use in your congregation.

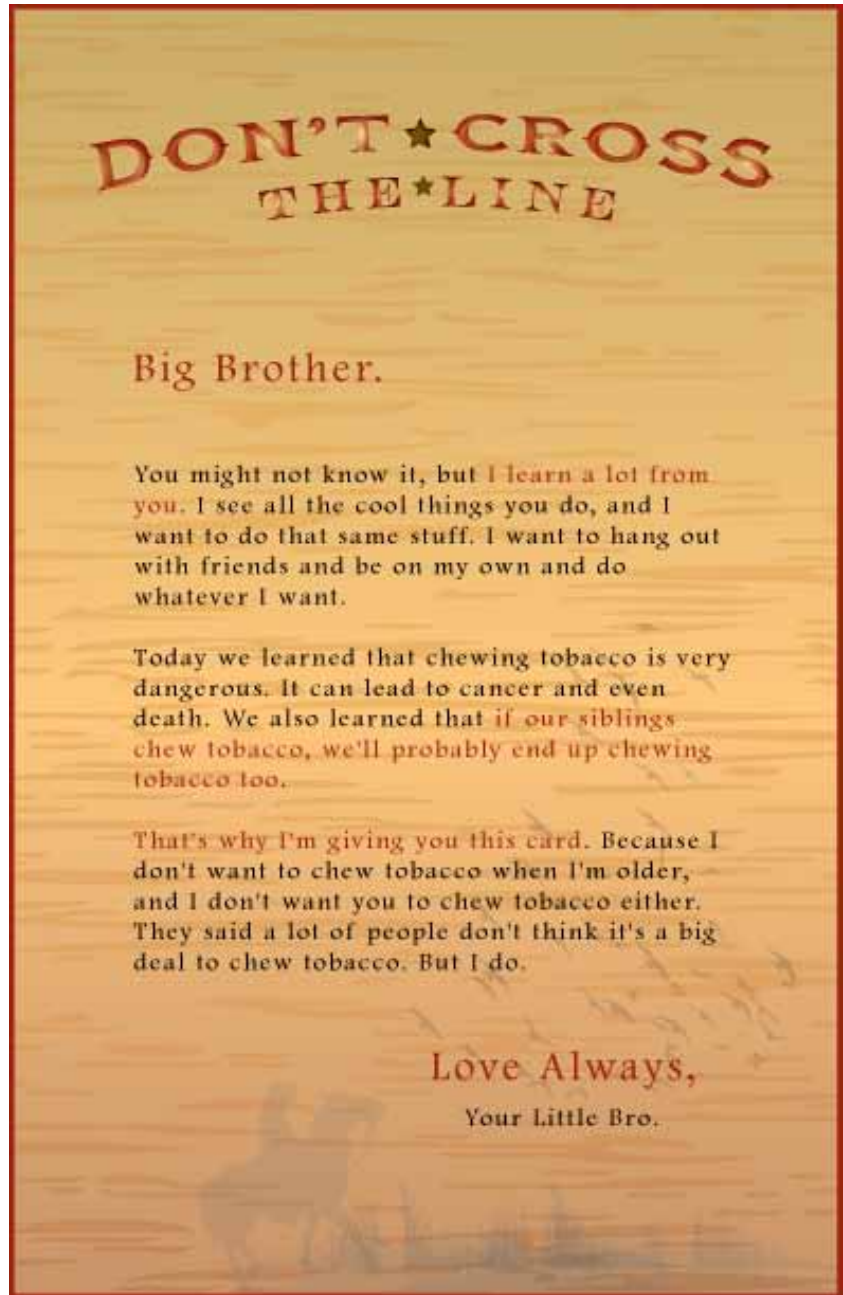

For a better Suwannee County

Youth Advocacy Project, "Don't Cross the Line"
- Coach & Pastor Cards

These information cards were part of a local campaign against spit tobacco in Suwannee County, Florida. We worked with local advocates to conduct research on tobacco use and social norms in order to develop a coherent, effective campaign to reduce tobacco use among adolescents.

Inside

**Youth Advocacy
Project, "Don't
Cross the Line"
- Coach & Pastor
Cards**

These greeting cards were given to the younger siblings of teens at risk for spit tobacco use. These letters drew on familial ties to help curb the otherwise statically high likelihood of spit tobacco use among siblings.
